

Concerned about the **carbon footprint** of your structure?

Spending **too much** on **energy costs**?

Choose the **Cambodian leader** in carbon auditing for a **tailor-made service**, complying with **international standards**, using **local solutions**.

A short term return on investment guaranteed!

CARBON AUDITING YOUR ORGANIZATION, THE BEST INVESTMENT IN TOMORROW !

Reduce your energy costs

Up to 25% savings on your energy bill with minimal investment.

Create business opportunities

benefit from the rise of new markets seeking low carbon goods and services.

Participate actively in climate change mitigation

take an active lead on placing Cambodia on a more sustainable path and enhance your corporate image.

Improve your corporate spirit

bring your teams together around a corporate project, offering them awareness on carbon emission and climate change.

GERES: 18 years of expertise in Cambodia

Since 1994, GERES has been working in Cambodia to develop energy-efficient solutions designed to preserve the environment, fight against climate change and improve the living conditions of the Cambodian population.

The experienced GERES team in Cambodia offers services, environmental solutions and consulting to companies, international organizations and local communities.

YOUR CARBON AUDIT, A PROCESS IN 4 STEPS

- 1. DEFINING** the scope of intervention, based on a tailor-made approach.
- 2. RAISING AWARENESS** on climate change among your staff (English and/or Khmer).
- 3. COLLECTING** the necessary data with user friendly processes to calculate your carbon footprint.
- 4. PROVIDING** practical recommendations to reduce your energy consumption and costs (both no-cost tips and investment projects with pay-back period) and follow-up sessions.

Dominique MAS – French Embassy of Cambodia

“The audit was a success thanks to the strong effort on awareness rising lead by GERES toward the French and Cambodian agents of the embassy. They are now convinced by the importance of an evolution of their everyday behavior, in their professional and personal life, in a country such as Cambodia, subject to high climatic risks.”

GERES follows the methodology of The Greenhouse Gas Protocol-A Corporate Accounting & Reporting Standard (Revised Edition), the international standard for carbon auditing. The reference data is issued from the standard national and international sources.*

John MCGINLEY - ANZ in South-East Asia

“ANZ Royal would like to thank GERES for the efficiency with which they has guided us. We now know what our carbon footprint is, and how to improve our environmental, performance. In the context of our partnership, the Carbon Audit team provided us with high quality reports, including very clear and practical recommendations aimed at reducing our footprint and our overheads.”

Climate change in Cambodia : why we all care

In 2011, **Cambodia** was considered part of the “**extremely**” vulnerable countries to climate change.

Based on the Maplecroft's Climate Change Vulnerability Index

The carbon emissions of a **company of 50 people equals** the annual emissions of **1,250 inhabitants.**

Buildings contribute to **40%** in the world in energy use, **transportation 30%** and **industry 30%**.

Laure Comble, Senior Carbon Advisor is your Project Manager.

Energy and Environmental Engineer, with 4 years of experience in energy efficiency and auditing.
